

How to use your Silhouette Studio Software with SVG files

When you are using the Silhouette Studio Designer Edition you can use your SVG files and get a beautiful, clean cut.

1. Open your SVG design in the Studio Software
2. Highlight the image
3. Click in the upper right corner on the word "Send"
4. This will open a new screen like the one shown in the picture
5. To see your cut lines in red you will click on the icon that looks like your cutter blade and then on the red boxes that say cut
6. after that you will just click on "send"
